

SUBCONTRACTING OPPORTUNITIES FY08

(1) Project: Enhanced Hazardous Waste Landfill (ELF) Cap Construction

Anticipated Solicitation Date: March 28, 2008
Anticipated Award Date: October 08, 2008
Project Manager: S. Skeen **Phone:** 303-289-0935

Scope of Work

Construction of a RCRA cover over the existing Rocky Mountain Arsenal Enhanced Hazardous Waste Landfill (ELF). The work will consist of the following:

- Preparation of subgrade to repair erosion damage.
- Installation of a layer of geocomposites consisting of geosynthetic, geomembrane and geotextile.
- Placement of a protective soil layer. Soil will be hauled from adjacent borrow area. Some Borrow area preparation such as clearing and grubbing and topsoil stripping may be required.
- Placement of a Biota Barrier consisting of 12 inch minus crushed concrete currently stockpiled on site.
- Placement of rock amended vegetative layers.
- Purchase and incorporation of soil amendment.
- Revegetation.
- Irrigation.

The work area is approximately 39 acres and will include placement of geosynthetics, crushed concrete and soil on slopes. Landfill closure will be completed by others.

The following solicitations are closed for subcontracting opportunities:

- Project: Misc. Structures Demolition and Removal (MSDR), Phase III
- Project: Design, Installation, and Operation of Irrigation Systems for the 2008 Irrigation Season
